LUXOR LED RIGID LIGHT STRIP – 1 CREE LED

Feature: MONO-LUXORModule	
LED Type:	3 watt Cree
Luminous flux (LM):	160LM
Lifetime(H):	20000H
Material:	Al base plate
Beam Angle:	15°*60°
Input Voltage (V):	DC24 V
Power consumption (W):	2W
Material:	Al base plate
Specification (MM):	50*35*1.6(mm)
Color temperature (K):	6000K Standard (Custom3000 ~3500K / 6500~7000K)

Luxor1 - Single Module LED Light Strip

Luxor1 - Single Module LED Light Strips are the perfect answer for lightbox applications that have a little twist. Whether there is a little gap to fill or design has a slight bend … **Luxor** is the solution!

Designed to fit in small spaces when Standard **Luxor5 Light Strips** are too long (14.25"L). **Luxor1** is only 2" long and a perfect fit for those tight spots. Link a few **Luxor1** modules together using **Prism Quick-Connect** cabling and your lighting solution can follow slight radius curves if the design calls for it.

Luxor Hi-Power LED Light Strips, are the perfect edge-lighting solution for backlight graphics. Using precision optical lenses, the **Luxor** LED Lens controls the beam exactly where it has to be, producing a bright white light evenly distributed throughout the graphic area. There are no limitations with **Luxor Hi-Power LED Light Strips**, as they can be used for single-side or double-sided graphics, tension fabric or traditional backlit graphic panels.

Luxor1- Single Module LED Light Strip by **Prism Lighting Group**, another bright innovation by the industry leaders in **LED Lighting**.
