

# MT48 HORIZONTAL LED 2-HEAD LIGHT STAND

## PRODUCT SUMMARY

The MT48H LED Light Stand offers amazing bright light from a single location. The sturdy, free-standing, telescopic light stand offers tremendous lighting flexibility with easy mobility and takes less than 2 minutes to assemble. Two state-of-the-art 24 Watt LED fixtures generate a pure white light (5000k) equal to 400+ Watts halogen, mounted on a horizontal cross bar are individually adjustable with 140 degrees tilt and 360 degrees rotation

The 2-head Horizontal light bar fits onto a telescopic support pole that is height adjustable from 4 ft. to 8 Ft. high. The Telescopic Support Pole has a concealed retractable power cord for ease of adjustability. The MT48 Light Stand is stable using a heavy duty powder coated metal base. The MT48H provides lighting greater than 400 watts of halogen but is significantly cooler, safer and uses a fraction of energy typically needed for such a pure bright white light.

Copied by many, but none can compare with quality and performance, as Prism's MT48 Horizontal Light Stand is the "Real McCoy" of LED Light Stands.

MT48H LED Light Stand, another Signature Series LED lighting product designed, engineered and built by Prism Lighting Group™.
