

MT96 LED TELESCOPIC LIGHT STAND

The MT96 4-HEAD LED Light Stand offers an incredible bright light source from a single location. With 880+ Watts of Light (halogen equal), yet only uses only 96 Watts of energy, the MT96 Light Stand truly stands alone. The sturdy, free-standing telescopic light stand offers tremendous flexibility with ease of mobility and takes only minutes to assemble.

Four state-of-the-art LED fixtures (220 watts each), are individually adjustable with 140 degrees tilt and almost 360 degrees rotation. The 4-head light bar fits onto a telescopic support pole that is height adjustable from 4 Ft. to 8 Ft.. The Support Pole has a concealed retractable power cord for effortless adjustability. The MT96 Light Stand is very stable with a heavy duty metal base.

The MT96 provides superior lighting to traditional halogen, yet significantly cooler, safer and uses up to 80% less electricity. MT96 Light Stand is cCSAus Certified for North America. Another Original series LED lighting product designed, engineered, and made by Prism.
