

SUPRA LED PANEL LIGHT

PRODUCT SUMMARY

Designed to be super bright for exhibit illumination and more aesthetically pleasing than traditional theatrical PARCAN; this light has the right punch and good looks to go with!

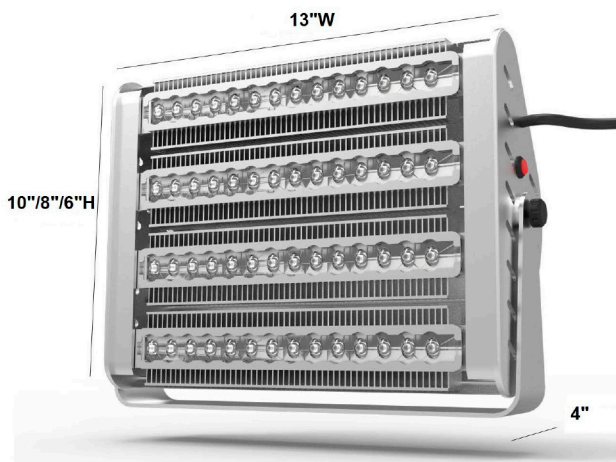

Supra LED Panel Light is very cost effective in comparison to a DMX light which has the equivalent light output but can be priced more than twice the amount. We have engineered a convenient intensity dial, so if the ceiling heights change, you can adjust the light output accordingly.

Especially designed with auto shows in mind, the Supra LED Panel Light is the perfect solution especially being able to link up to 12 fixtures onto one 20amp outlet. You can have 6 units on one pow-

SPECIFICATIONS

- Model: SUPRA LED 160/120/80W LED PANEL Light
- Voltage: 90V-250V AC
- Power: 160/120/80W
- Lumens: 14720/11040/7360+lm
- Efficiency: 92lm/w
- Temp: -25 to + 70c
- CCT: 6000K
- Fusing: Internal
- CRI: 70+
- Intensity Dial: 100%, 75%, 50%, 25%
