PLG50248

## Product Features

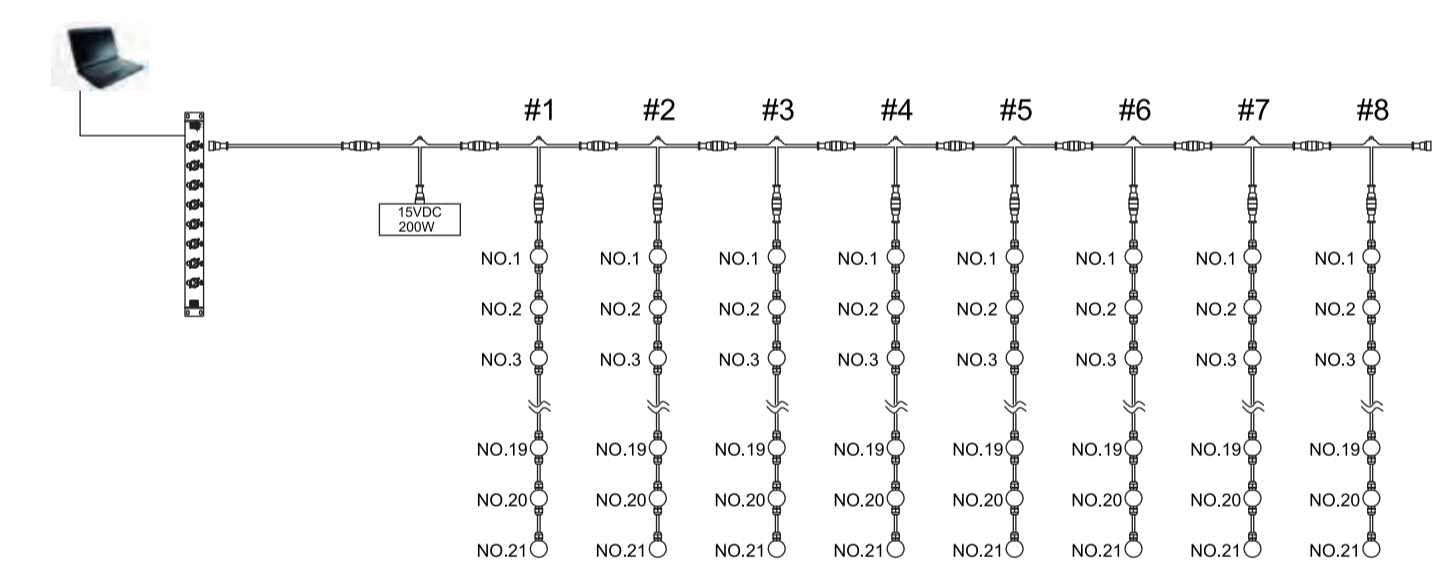

- DMX 3D Pixel balls can be suspended from the ceiling vertically on stage, at events, theme parks and more.
- With Multiple LED Balls, you can form a video light curtain or 3D visual matrix.
- Lighting effects can be seen from 360 Degrees
- 2D pixel mapping can be transformed to 3D with software programming.
- PCB Solid capacitor is applied and high quality components are used for long life time
- With wide voltage range design, LED Color always keeps same brightness and lighting effects even when the power supply is far away.
- Standard DMX512 control protocol (Max 44frames/Second).
- Communication between pixel balls are synchronized perfectly using Colordreamer ArtNet Controller.
- Lightning and ESD Protection.
- Electrical protections including short circuit, over current, over voltage and over temperature.
