

INTRODUCING LOVO™ EDGE SERIES

Prism Lighting Group is proud to announce our newest product series - LOVO™EDGE - a unique edge lighting concept that safely, quickly and easily integrates with existing exhibit systems such as beMatrix and Aluvision. This allows you to stand out from the competition with unique lighting solutions previously unavailable while using these exhibit systems.

The entire LOVO™ line has been designed using the three principles of safety, simplicity and speed, combining a safe working voltage, wire management and our signature 'FC' (Fast Connect) connection system.
